

WX700 Expandable Sleeving for Space Systems

Taking your bundle coverage to the PEEK of excellence!

WX700, "PEEK" (PolyEtherEther-Ketone) is a high performance advanced polymer with outstanding physical properties. Inherently flame retardant, with a V-0 flammability rating, WX700 will withstand continuous use in superheated water or steam.

WX700 resists damage from radiation and will continue to perform in outer space and UHV (Ultra High Vacuum) environments. It is extensively used in the aerospace due to it's low off-gassing and self extinguishing properties.
